Rainwater Runoff

	1. Standard Not Met	2. Approaching Standard	3. Standard Met	4. Exceeding Standard
MS-ETS1-3 - Engineering Design Analyze data from tests to determine similarities and differences among several design solutions to identify the best characteristics of each that can be combined into a new solution to better meet the criteria for success.	Analyzed data from tests of an object or tool to determine if it works as intended.	Analyzed data from tests to determine similarities or differences among design solutions to identify the better solutions.	Analyzed data from tests to determine similarities and differences among several design solutions to identify the best characteristics of each that can be combined into a new solution to better meet the criteria for success.	Evaluated the impact of new data on a working explanation and/or model of a proposed process or system. Analyzed data to identify design features or characteristics of the components of a proposed process or system to optimize it relative to criteria for success.
